

CPA ARCTIC JACKET

The CPA jacket is an all-weather field jacket that differs from most other Gore-Tex Jackets because of the Micro Grid Liner system. The liner system gives the operator a jacket that have better camouflage characteristics, better moist transportation in minus degrees Celsius, all the way down to minus 50, than other membrane jackets. It has ventilation in the right places when using load bearing equipment. It has a large hood with detaschable fur and pockets to keep the most important pieces of kit secure.

FUNCTIONS

- UV/VIS/IRR
- Adjustable hood
- The screen on the hood has a steel wire so it can be adjusted to protect the face in wind and rain
- Removable fur trim around the opening of the hood, attached with Velcro
- Heavy duty 2-way front zipper hidden by front flap
- Compass pocket with velcro closure on front flap
- Velcro on the front of the compass pocket for labels
- Spacious napoleon pockets with zip closure inside the front flaps and with an internal phone pocket. The pockets are hidden under the front flaps for access without opening the jacket
- Hip pockets with zips and velcro pocket lids
- Removable holder for battery pack inside the napoleon pocket
- Sleeve pockets with velcro closure, bellows, pocket lid and internal loop for securing equipment
- Velcro on sleeve pockets for labeling
- Pre-shaped sleeves
- Reinforcements on elbows with padded protection against contact cold and hard surfaces
- Ventilation openings with waterproof zipper under the arms
- Velcro adjustment at sleeve ends
- Mesh pocket on the inside back that can be advantageously used to store coveralls in
- Width adjustment at the bottom of the jacket using elastic cords hidden in the front pockets
- Internal crotch at the bottom
- Wind and waterproof with taped seams and breathability

FACTS

Article no.	013203005
