MA JACKET

Our Mountain Arctic set has been developed in close collaboration with specialists in Mountain Warfare in arctic environments. The garment has been rigorously tested under very difficult conditions in some of the most extreme environments and gives the soldier the perfect conditions to be able to deliver the performance required. The jacket is perfect for high intensity activities such as mountaineering, cross-country skiing and other demanding sports. With the right combination of inner layers and mid-layer garments from our other ranges, this jacket provides a highly flexible system with reduced weight and volume. The set is currently used by units in climate zones C1 - C3 (Arctic zones). The jacket is suitable for use in forests as well as alpine terrain. The design is robust, uncomplicated and adapted to work with the other personal equipment used in Mountain Warfare. The design enables superb freedom of movement and good conditions for demanding work in harsh climates.

FUNCTIONS

- Comfortable fit with space for additional insulating layers
- Pre-shaped sleeves
- Added tough padded protection on the elbows to help protect against hard and cold surfaces
- Hood can be used with or without a helmet and can be adjusted accordingly
