CPA ARCTIC TROUSERS

Our CPA Arctic Trousers are the result of over 10 years of development work in collaboration with a wide range of end users. The trousers are designed as a liner and can be adjusted to suit temperatures between + 5 and -50 degrees Celsius by adjusting the insulating layers. The liner system creates an air pocket between the membrane and the outer fabric to maintain the breathability of the membrane even at extreme temperatures.

FUNCTIONS

- Our unique brace system with velcro adjustment for right length
- Raised at the back
- Waistband with belt loops
- Two-way zip fly in front, hidden by protective flap
- Zipped side pockets
- Spacious leg pockets with velcro pocket lids, elastic at the top and bellows
- Pre-shaped knees for maximum mobility and comfort
- Cordura reinforced knees with knee pockets with velcro closure for extra padding and padded protection against contact cold or hard surfaces
- Ventilation opening at the top of the side seam
- Zips to the knees for easier dressing
- Leg opening with tension strap for width adjustment
- Cordura reinforced leg ends
- Loop for the possibility of attaching leg ends to shoes
- Wind and waterproof, taped seams and breathability
- UV/VIS/IRR

FACTS

Article no.	023203105
Sizes	XS-3XL ML-XLL
